DETAILED ACTION

Election/Restrictions

1. Claims 13-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 3. the applicant has traversed the election states that the distinct variation of the catheter merely mean different composition of the various catheter tube and that does not make the invention distinct, however it's the different composition and limitations that distinguish one invention from the next. Furthermore the different variation will required additional search and consideration, hence the election is proper and is maintained.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No.5817072 to Lampropoulos et al.

Art Unit: 3763

Lampropoulos teaches a first catheter, a second catheter located within the first catheter, a third catheter located with the second catheter; wherein the second catheter has bendable curved memory portion; the second catheter has plurality of flushing orifices.
